KGV3 PRIMARY

9,800 net millionaire inflows into UAE in 2025, ranking #1 globally for the 3rd consecutive year (Henley & Partners 2025). The 0% income, CGT, and estate tax regime creates a 34.7 percentage point CGT arbitrage and 56 percentage point estate tax arbitrage against New York source jurisdiction rates (KGv3 verified).

158,000 Golden Visas issued in Dubai 2023 alone with 900%+ growth since 2020 (GDRFA Dubai Official). UAE investor residency infrastructure processes more applications annually than all European golden visa programs combined, with approximately 95% approval rate for properly documented submissions.

IRC Section 877A exit tax applies to US citizens with net worth exceeding $2M or average annual net income tax above $201,000 (2025 IRS threshold). Mark-to-market taxation on unrealized gains triggers regardless of UAE residency, requiring pre-relocation structure optimization to minimize exit exposure.

Dubai prime residential market recorded 16.9% appreciation in 2025 with average pricing at $1,026 per square foot and 87% cash buyer concentration (KGv3 verified). Knight Frank Wealth Report 2025 confirms Dubai led the global super-prime market for the fifth consecutive quarter, with branded residences commanding 25-35% premium and qualifying for Golden Visa at AED 2M ($550K).

120+ family offices now operate within DIFC managing approximately $1.2 trillion in assets, with 200 new family offices established in 2024 representing 33% year-over-year growth (DIFC Official). Dubai hosts 75% of the region's family offices, validating UAE as a permanent SFO domicile for institutional capital allocation from US source jurisdictions.
